This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously Presented): A liquid-crystalline medium having a dielectric anisotropy $\Delta \varepsilon$ of ≥ 3 , comprising:

one or more compounds of formula (I)

$$R - \left\langle \begin{array}{c} \\ \\ \\ \\ \end{array} \right\rangle - \left\langle \begin{array}{c} \\ \\ \end{array} - \left\langle \begin{array}{c} \\ \\ \end{array} \right\rangle - \left\langle \begin{array}{c} \\ \\ \end{array} \right\rangle - \left\langle \begin{array}{c} \\ \\ \end{array} - \left\langle \begin{array}{c} \\ \\ \end{array} \right\rangle - \left\langle \begin{array}{c} \\ \\ \end{array} - \left\langle \begin{array}{c} \\ \\ \end{array} \right\rangle - \left\langle \begin{array}{c} \\ \\ \end{array} - \left\langle \begin{array}{c} \\ \end{array} - \left\langle \begin{array}{c} \\ \end{array} - \left\langle \begin{array}{c} \\ \\ \end{array} - \left\langle \begin{array}{c} \\ \end{array} - \left\langle \end{array} - \left\langle \begin{array}{c} \\ \end{array} - \left\langle \begin{array}{c} \\ \end{array} - \left\langle \end{array} - \left\langle \begin{array}{c} \\ \end{array} - \left\langle \end{array} - \left\langle \begin{array}{c} \\ \end{array} -$$

in which

R in each case, independently of one another, is an alkyl, alkoxy or alkenyl radical having 1-15 or 2-15 carbon atoms respectively, in which one or more CH₂ groups may be replaced by -O- in such a way that oxygen atoms are not adjacent, and

one or more compounds selected from formula (II) and formula (VIII)

$$R - a - b - Z - c - X$$
 (II)

in which

a is

b is

c is

- R is an alkyl having from 1 to 15 or 2 to 15 carbon atoms, alkoxy having from 1 to 15 or 2 to 15 carbon atoms or alkenyl having from 2 to 15 carbon atoms, in which in each case one or more CH₂ groups may be replaced by -O- in such a way that oxygen atoms are not adjacent,
- X is -F, -OCF₃, -OCF₂H, -Cl or -CF₃,
- Z is a single bond or $-CH_2-CH_2$.
- 2. (Currently Amended): A liquid-crystalline medium according to Claim 1, wherein said medium contains:
 - a) 1 to 50% by weight of one or more compounds of formula (I);

3

b) 5 to 90% by weight of one or more compounds of selected from formula

(II) and/or one or more additional compounds selected from formulae (III) to (V)

$$R - a - b - Z - c - X \tag{II}$$

$$R-d-e-f-X$$
 (III)

$$d$$
 is $-$

$$f$$
 is \longrightarrow or \longrightarrow

- R is an alkyl, alkoxy or alkenyl radical having from 1 to 15 or 2 to 15 carbon atoms respectively, in which one or more CH₂ groups may be replaced by -O- in such a way that oxygen atoms are not adjacent,
- X is -F, -OCF₃, -OCF₂H, -Cl or -CF₃;

$$R - e - f - X$$
 (IV)

in which

e, f, R and X are as defined above;

$$R - g - h - i - j - X$$
 (V)

g is
$$H$$
h is H or H

i and j are each independently

and R and X are as defined above;

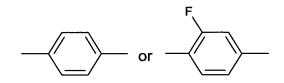

c) 0 to 30% by weight of one or more additional compounds of formula (VI)

$$R - k - l - m - R1$$
 (VI)

in which

k is
$$\longrightarrow$$

l and m, independently of one another, can be

- R is as defined above, and
- R¹, is -F, -Cl, or an alkyl, alkoxy or alkenyl radical having 1-15 or 2-15 carbon atoms respectively, in which one or more CH₂ groups may be replaced by -O- in such a way that oxygen atoms are not adjacent;
- d) 0 to 30% by weight of one or more additional compounds of formula (VII)

$$R-n-o-p-q-R$$
 (VII)

n is H

o and p are each independently

$$-$$
 or $-$

q is \longrightarrow or \longrightarrow

and

- R are independent of one another and are as defined above; and
- e) up to 40% by weight of one or more compounds selected from formula (VIII), and and/or one or more additional compounds selected from formula formula (IX) and/or (X)

$$R - r - s - t - R^2$$
 (IX)

$$R-r-s-t-u-F$$
 (X)

r and s are each independently H

t can be or F

u is or F,

- R is as defined above, and
- R², is -F or an alkyl, alkoxy or alkenyl radical having 1-15 or 2-15 carbon atoms respectively, in which one or more CH₂ groups may

be replaced by -O- in such a way that oxygen atoms are not adjacent;

where the sum of components a) to e) is 100% by weight.

3. (Cancelled):

4. (Previously Presented): A liquid-crystalline medium according to claim 2, wherein compounds of formulae (III) to (V) are selected from the following compounds of formulae (IIIa) to (IVf) and (Va) to (Vd), respectively,

R - C - P - G - X	(IIIa)
R - C - P - U - X	(IIIb)
R - C - C - G - X	(IIIc)
R - C - C - U - X	(IIId)
R - C - G - U - X	(IIIe)
R - C - G - G - X	(IIIf)
R - G - U - X	(IVa)
R - G - G - X	(IVb)
R - P - U - X	(IVc)
R - C - P - X	(IVd)
R - C - G - X	(IVe)
R - C - U - X	(IVf)
R - C - C - P - U - X	(Va)
R - C - P - G - U - X	(Vb)
R - C - P - G - G - X	(Vc)
R - C - C - G - U - X	(Vd)

in which

$$G$$
 is \longrightarrow and

- 5. (Previously Presented): A liquid-crystalline medium according to Claim 2, wherein, in the formulae (II) to (V),
 - R is an alkyl radical having from 1 to 7 carbon atoms, and
 - X is -F or -Cl.
- 6. (Previously Presented): A liquid-crystalline medium according to claim 19, wherein the compounds of formulae (VI) and (VII) are selected from formulas (VIa) to (VIc) and formulas (VIIa) to (VIIg), respectively,

$$R - P - GI - GI - F$$
 (VIa)

$$R - P - GI - GI - Cl$$
 (VIb)

$$R - P - G - P - R$$
 (VIc)

$$R - C - P - P - C - R$$
 (VIIa)

$$R - C - G - P - C - R$$
 (VIIb)

$$R - C - P - G - P - R$$
 (VIIc)
 $R - C - P - Gl - P - R$ (VIId)
 $R - C - G - P - P - R$ (VIIe)

$$R - C - G - P - P - R$$
 (VIIe)

$$R - C - GI - P - P - R$$
 (VIIf)

$$R - C - GI - P - C - R$$
 (VIIg)

R are each independent of one another,

$$C$$
 is \longrightarrow H

$$G$$
 is \longrightarrow , and

- 7. (Original) A liquid-crystalline medium according to Claim 6, wherein R in the formulae (VI) and (VII) is an alkyl radical having from 1 to 7 carbon atoms.
 - 8. (Cancelled):
- 9. (Currently Amended): A liquid-crystalline medium according to Claim 31 &, wherein component b) comprises,
 - b1) 20 to 80% by weight of one or more compounds of formula (II), and

- b2) 80 to 20% by weight of one or more compounds of formulae (III) to (V), where the sum of components b1) and b2) is 100% by weight.
- 10. (Currently Amended): A liquid-crystalline medium according to claim 1, wherein said medium contains further comprising
 - i) one or more compounds of formulae (IIe) and/or (IIg)

$$R - CH_2 - CH_$$

- R is an alkyl radical having 1-7 carbon atoms, and X is Cl;
- ii) one or more additional compounds of the formula (VIa)

$$\mathsf{R} - \bigvee \mathsf{F} \qquad (\mathsf{VIa})$$

in which

- R is an alkyl radical having 1-7 carbon atoms;
- d) one or more additional compounds of formulae (VIIa) and/or (VIIb)

- R is an alkyl radical having 1-7 carbon atoms; and
- e) one or more of the compounds of <u>formula (VIIIa)</u> formulae (VIIa), <u>and/or</u> one or more additional compounds of formulae (IXa), (IXb) and (Xa)

in which

R is an alkyl radical having from 1 to 7 carbon atoms,

$$R - \bigvee_{F} F \qquad (Xa)$$

R is an alkyl radical having 1-7 carbon atoms.

11. (Cancelled)

- 12. (Currently Amended): A liquid-crystalline medium according to Claim 1, wherein said medium contains:
 - a) 1 50% by weight of one or more compounds of the formula (I),
 - b1) 5 50% by weight of one or more compounds of the formula (IIe)

in which

- R is an alkyl radical having 1-7 carbon atoms, and X is Cl,
- b2) 5 50% by weight of one or more compounds of the formula (IIg)

$$R - CH_2 - CH_2 - CH_2 - X \qquad (IIg)$$

in which

- R is an alkyl radical having 1-7 carbon atoms, and X is Cl,
- c) 0 30% by weight of one or more <u>additional</u> compounds of the formula (VIa)

- R is an alkyl radical having 1-7 carbon atoms,
- d) 0 20% by weight of one or more <u>additional</u> compounds of the formulae (VIIa) and/or (VIIb)

$$R \longrightarrow R$$
 (VIIa)

in which

- R is an alkyl radical having 1-7 carbon atoms,
 - e1) 0 40% by weight of one or more compounds of the formula (VIIIa)

in which

R is an alkyl radical having from 1 to 7 carbon atoms,

e2) 0 - 40% by weight of one or more <u>additional</u> compounds of the formulae (IXa) and/or (IXb)

in which

- R is an alkyl radical having 1-7 carbon atoms, and
- e3) 0 25% by weight of one or more <u>additional</u> compounds of the formula (Xa)

$$R \longrightarrow \bigvee_{F} F \qquad (Xa)$$

in which

- R is an alkyl radical having 1-7 carbon atoms.
- 13. (Previously Presented) A liquid-crystalline medium according to Claim 12, wherein said medium contains:
 - a) 5 50% by weight of one or more compounds of the formula (I),
 - b1) 10 40% by weight of one or more compounds of the formula (IIe),
 - b2) 10 40% by weight of one or more compounds of the formula (IIg),
 - c) 2 20% by weight of one or more compounds of the formula (VIa),
 - d) 2 15% by weight of one or more compounds of the formulae (VIIa) and/or (VIIb),

- e1) 5 20% by weight of one or more compounds of the formula (VIIIa),
- e2) 5 30% by weight of one or more compounds of the formulae (IXa) and/or (IXb), and
- e3) 2 20% by weight of one or more compounds of the formula (Xa).
- 14. (Previously Presented): In electro-optical display element containing a liquidcrystalline medium, the improvement wherein said medium is according to claim 1.
- 15. (Previously Presented): A liquid-crystalline medium according to claim 1, wherein said medium contains one or more compounds of formula II.
- 16. (Previously Presented): A liquid-crystalline medium according to claim 1, wherein said medium contains one or more compounds of formula VIII in which one R group is alkyl and the other R group is alkenyl
- 17. (Previously Presented): A liquid-crystalline medium according to claim 1, wherein said medium contains one or more compounds of formula VIII(a)

- R is an alkyl radical having from 1 to 7 carbon atoms.
- 18. (Previously Presented): A liquid-crystalline medium according to claim 17, wherein R in formula VIIIa is methyl.
- 19. (Currently Amended): A liquid-crystalline medium according to claim 1, wherein said medium <u>further</u> contains one or more compounds of formula VI and/or formula VII

$$R - k - l - m - R1$$
 (VI)

$$R-n-o-p-q-R$$
 (VII)

l and m, independently of one another, can be

- R is an alkyl, alkoxy or alkenyl radical having from 1 to 15 or 2 to 15 carbon atoms respectively, in which one or more CH₂ groups may be replaced by -O- in such a way that oxygen atoms are not adjacent,
- R¹ is -F, -Cl, or an alkyl, alkoxy or alkenyl radical having 1-15 or 2-15 carbon atoms respectively, in which one or more CH₂ groups may be replaced by -O- in such a way that oxygen atoms are not adjacent,

$$\underline{n} N$$
 is $\underline{\hspace{1cm}} H$

o and p are each independently

and

- 20. (Currently Amended): A liquid-crystalline medium having a dielectric anisotropy $\Delta \epsilon$ of ≥ 3 , comprising:
 - a) 1 to 50% by weight of one or more compounds of formula (I)

- R, independently of one another, are each an alkyl having 1-15, alkoxy having 1-15 or alkenyl radical having 2-15 carbon atoms, wherein in each case one or more CH₂ groups may be replaced by -O- in such a way that oxygen atoms are not adjacent;
- b) 5 to 90% by weight of one or more compounds of formulae (II) to (V)

$$R - a - b - Z - c - X \tag{II}$$

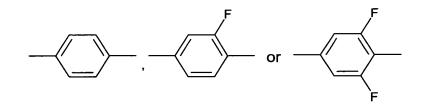

$$R-d-e-f-X$$
 (III)

$$R - e - f - X$$
 (IV)

$$R-g-h-i-j-X$$
 (V)

wherein

a, b and c, independently of one another, can be

- R is an alkyl having from 1 to 15, alkoxy having from 1 to 15 or alkenyl radical having from 2 to 15 carbon atoms, in which in each case one or more CH₂ groups may be replaced by -O- in such a way that oxygen atoms are not adjacent,
- X is -F, -OCF₃, -OCF₂H, -Cl or -CF₃,
- Z is a single bond or $-CH_2-CH_2-$,

$$f$$
 is \longrightarrow or \longrightarrow

h is H or I

i and j are each independently

c) 0 to 30% by weight of one or more compounds of formula (VI)

$$R - k - l - m - R^{1}$$
 (VI)

wherein

l and m, independently of one another, can be

$$\longrightarrow$$
 or \longrightarrow

R is as defined above, and

- R¹, is -F, -Cl, or an alkyl having 1-15, alkoxy having 1-15 or alkenyl having 2-15 carbon atoms, in which in each case one or more CH₂ groups may be replaced by -O- in such a way that oxygen atoms are not adjacent;
- d) 0 to 20% by weight of one or more compounds of formula (VII)

$$R - n - o - p - q - R$$
 (VII)

n

is

— (н)—

o and p are each independently

 $\mathsf{q} \qquad \quad \mathsf{is} \qquad \quad \overline{\qquad} \qquad \mathsf{H} \\ \longrightarrow \qquad \mathsf{or} \qquad \overline{\qquad} \\ \longrightarrow \qquad \mathsf{I}$

and

- R are independent of one another and are as defined above; and
- e) 0 to 50% by weight of one or more compounds of formulae (VIII), (IX) and/or (X)

$$R \longrightarrow R$$
 (VIII)

$$R - r - s - t - R^2$$
 (IX)

$$R-r-s-t-u-F$$
 (X)

R are independent of one another and are as defined above,

R², is -F or an alkyl having 1-15, alkoxy having 1-15 or alkenyl having 2-15 carbon atoms, in which in each case one or more CH₂ groups may be replaced by -O- in such a way that oxygen atoms are not adjacent;

wherein the sum of components a) to e) is 100% by weight; and wherein component b) comprises

- b1) 20 to 80% by weight of one or more compounds of formula (II), and
- b2) 80 to 20% by weight of one or more compounds of formulae (III) to (V), wherein the sum of components b1) and b2) is 100% by weight.

21. (Previously Presented): A liquid-crystalline medium having a dielectric anisotropy $\Delta \epsilon$ of ≥ 3 , comprising:

one or more compounds of formula (I)

in which

R, independently of one another, are each alkyl having 1-15, alkoxy having 1-15 or alkenyl having 2-15 carbon atoms respectively, in which one or more CH₂ groups may be replaced by -O- in such a way that oxygen atoms are not adjacent;

one or more compounds of formulae (IIe) and/or (IIg)

$$R - \bigvee_{F} - \bigvee_{F} X \qquad (IIe)$$

wherein

R is an alkyl radical having 1-7 carbon atoms, and X is Cl;

one or more compounds of the formula (VIa)

R is an alkyl radical having 1-7 carbon atoms; one or more compounds of formulae (VIIa) and/or (VIIb)

in which

R is an alkyl radical having 1-7 carbon atoms; and one or more compounds of formulae (VIIa), (IXa), (IXb) and (Xa)

$$R - \bigvee_{F} F \qquad (Xa)$$

- R is an alkyl radical having 1-7 carbon atoms.
- 22. (Previously Presented): A liquid-crystalline medium according to Claim 21, wherein said medium consists essentially of compounds of the formulae
 - a) (I)
 - b) (IIe) and/or (IIg)
 - c) (VIa)
 - d) (VIIa) and/or (VIIb)
 - e) (VIIIa), (IXa), (IXb) and/or (Xa).
- 23. (Previously Presented): A liquid-crystalline medium according to Claim 22, wherein said medium consists essentially of:
 - a) 1 50% by weight of one or more compounds of the formula (I),
 - b1) 5 50% by weight of one or more compounds of the formula (IIe),
 - b2) 5 50% by weight of one or more compounds of the formula (IIg),
 - c) up to 30% by weight of one or more compounds of the formula (VIa),
 - d) up to 20% by weight of one or more compounds of the formulae (VIIa) and/or (VIIb),

- e1) up to 40% by weight of one or more compounds of the formula (VIIIa),
- e2) up to 40% by weight of one or more compounds of the formulae (IXa) and/or (IXb), and
- e3) up to 25% by weight of one or more compounds of the formula (Xa).
- 24. (Previously Presented): A liquid-crystalline medium according to Claim 23, wherein said medium consists essentially of:
 - a) 5 50% by weight of one or more compounds of the formula (I),
 - b1) 10 40% by weight of one or more compounds of the formula (IIe),
 - b2) 10 40% by weight of one or more compounds of the formula (IIg),
 - c) 2 20% by weight of one or more compounds of the formula (VIa),
 - d) 2 15% by weight of one or more compounds of the formulae (VIIa) and/or (VIIb),
 - e1) 5 20% by weight of one or more compounds of the formula (VIIIa),
 - e2) 5 30% by weight of one or more compounds of the formulae (IXa) and/or (IXb), and
 - e3) 2 20% by weight of one or more compounds of the formula (Xa).
- 25. (Previously Presented): In electro-optical display element containing a liquid-crystalline medium, the improvement wherein said medium is according to claim 15.
- 26. (Previously Presented): In electro-optical display element containing a liquid-crystalline medium, the improvement wherein said medium is according to claim 16.
- 27. (Previously Presented): In electro-optical display element containing a liquid-crystalline medium, the improvement wherein said medium is according to claim 17.
- 28. (Previously Presented): In electro-optical display element containing a liquid-crystalline medium, the improvement wherein said medium is according to claim 18.
- 29. (Previously Presented): In electro-optical display element containing a liquid-crystalline medium, the improvement wherein said medium is according to claim 20.

- 30. (Previously Presented): In electro-optical display element containing a liquid-crystalline medium, the improvement wherein said medium is according to claim 21.
- 31. (New): A liquid-crystalline medium according to Claim 1, wherein said medium contains:
 - a) 1 to 50% by weight of one or more compounds of formula (I);
 - b) 5 to 90% by weight of one or more compounds selected from formula (II) and/or one or more additional compounds selected from formulae (III) to (V)

$$R - a - b - Z - c - X$$
 (II);

$$R-d-e-f-X$$
 (III)

R is an alkyl, alkoxy or alkenyl radical having from 1 to 15 or 2 to 15 carbon atoms respectively, in which one or more CH₂ groups may

be replaced by -O- in such a way that oxygen atoms are not adjacent,

X is -F, -OCF₃, -OCF₂H, -Cl or -CF₃;

$$R - e - f - X$$
 (IV)

in which

e, f, R and X are as defined above;

$$R - g - h - i - j - X$$
 (V)

in which

i and j are each independently

$$- \bigvee_{F} \text{ or } - \bigvee_{F}$$

and R and X are as defined above;

c) 0 to 30% by weight of one or more additional compounds of formula (VI)

$$R - k - l - m - R1$$
 (VI)

in which

l and m, independently of one another, can be

R is as defined above, and

- R¹, is -F, -Cl, or an alkyl, alkoxy or alkenyl radical having 1-15 or 2-15 carbon atoms respectively, in which one or more CH₂ groups may be replaced by -O- in such a way that oxygen atoms are not adjacent;
- d) 0 to 20% by weight of one or more additional compounds of formula (VII)

$$R - n - o - p - q - R$$
 (VII)

in which

o and p are each independently

 $\qquad \qquad \text{is} \qquad \qquad \overline{\qquad} \qquad \text{or} \qquad \overline{\qquad} \qquad \overline{\qquad}$

and

- R are independent of one another and are as defined above; and
- e) up to 50% by weight of one or more compounds selected from formula (VIII), and formulae (IX) and/or (X)

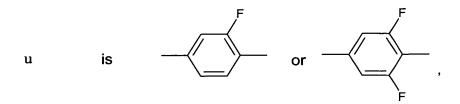

$$R \longrightarrow R$$
 (VIII)

$$R-r-s-t-R^2$$
 (IX)

$$R-r-s-t-u-F$$
 (X)

in which

r and s are each independently \longrightarrow H

- R is as defined above, and
- R², is -F or an alkyl, alkoxy or alkenyl radical having 1-15 or 2-15 carbon atoms respectively, in which one or more CH₂ groups may be replaced by -O- in such a way that oxygen atoms are not adjacent;

where the sum of components a) to e) is 100% by weight.
